

Oak Ridge Institute for Science and Education
RESEARCH PARTICIPATION PROGRAM For the
NATIONAL GEOSPATIAL- INTELLIGENCE AGENCY (NGA)

Visiting Scientist Fellowship Program
Academic Interns and Fellows Project

PROJECT #NGA-LC-2009-15

The National Geospatial-Intelligence Agency (NGA) provides timely, relevant, and accurate geospatial intelligence in support of national security objectives. Geospatial intelligence is the exploitation and analysis of imagery and geospatial information to describe, assess, and visually depict physical features and geographically referenced activities on the Earth. Information collected and processed by NGA is tailored for customer-specific solutions. By giving customers ready access to geospatial intelligence, NGA provides support to civilian and military leaders and contributes to the state of readiness of U.S. military forces. NGA also contributes to humanitarian efforts such as tracking floods and fires and in peacekeeping. NGA is a member of the U.S. Intelligence Community and a Department of Defense (DoD) Combat Support Agency. Headquartered in Bethesda, MD, NGA operates major facilities in the St. Louis, MO and Washington, D.C. areas. The Agency also fields support teams worldwide.

PROJECT DETAILS

The National Geospatial-Intelligence Agency (NGA) is looking to select undergraduates, postgraduate students or faculty members to provide technical support for research and development activities. NGA conducts work in the areas of remote sensing, sensors and signatures, geodesy and geophysics, and geospatial analytic techniques. These include work in automated image analysis, spectral exploitation, gravitational and geomagnetic modeling, subsurface geophysical sensor applications, human computer interfaces, neuroscience, information technology, and other related subjects.

This appointment may include, but is not limited to, the following:

- Testing algorithms, evaluating and developing analytical techniques, analyzing data and physical models, and other R&D work commensurate with the applicant's background and experience;
- Working closely with NGA data, with NGA scientists and other outstanding scientists in the NGA environment, and with NGA analysts;
- Planning and executing original research; and
- Assembling a corpus of evaluated ground-truth data.

Several appointments are available at NGA sites or mutually agreeable facilities.

INDIRECT BENEFITS OF POSITION

Selected interns and fellows will have the opportunity to perform research on topics of interest to the U.S. Government. NGA's extensive partnering relationships with other government agencies will expose interns and fellows to a broad government research community. Program participants will have the opportunity to meet government scientific decision-makers and learn directly from them about the role of scientific research in government activities. Furthermore, selected interns and fellows have the opportunity to learn how research products transition from the proof-of-concept stage to integrated production systems.

ELIGIBILITY

- Student applicants must be enrolled in an accredited Bachelor's (completed third or fourth year), Master's, or Ph.D. program in mathematics, computer science, physics, image science, photogrammetry, remote sensing, geoscience, geography, statistics, economics, geospatial information science, or a closely related field and maintain a minimum 3.0/4.0 grade point average.
- Current college or university faculty members on sabbatical are also eligible.
- Other applicants will be considered on a case-by-case basis.

Oak Ridge Institute for Science and Education
RESEARCH PARTICIPATION PROGRAM For the
NATIONAL GEOSPATIAL- INTELLIGENCE AGENCY (NGA)

- Applicants should have experience in working within a research environment and show an ability to meet task deadlines and goals. Applicants should also have excellent verbal and written communication skills. Modern computer skills and experience in scientific programming, data visualization, or 3-D graphics are also desirable.
- U.S. citizenship is required for the applicant. Please see further eligibility under Security Requirements.
- A background check will be conducted for a Sensitive Compartmented Information (SCI) security clearance. Completion of a Questionnaire for National Security Positions is required. Details can be found under the Security Requirements section.
- NGA is a drug-free workplace. Initial and random drug tests will be conducted.

BASIS OF SELECTION

Participants will be selected based on research interests stated in a 2-4 page research proposal, relevant experience, academic performance, overall technical expertise, publications, recommendations, and compatibility of background with basic and applied research programs and projects at NGA and/or the host installation.

RESEARCH PROPOSAL

The research proposal is a concise statement of the proposed research topic, including anticipated goals and outcomes, work products, methodologies, hypothesis, if appropriate, and timeline. An explanation of the relationship to the candidate's previous work or research experience is desirable. Relevant benefits and relationship to the NGA mission and objectives should also be included. The research proposal is a significant component of the selection criteria. There is a four-page limit to the proposal. NGA and the selected candidate will work cooperatively to define mutual research assignments and goals in support of the NGA mission and the candidate's educational pursuits.

APPOINTMENT TERM AND WORK ENVIRONMENT

The initial appointment period will vary from 3 months to one year. The appointment may be renewed for up to three periods based upon recommendation of NGA and subject to availability of funds. This is a full time residency appointment with NGA. Work will require SCI clearances and drug testing, and work will not begin until all security processes and drug testing are completed successfully. **Applicants should be aware that due to security requirements, applications should be submitted no later than 6 months prior to desired start date.** During the entire period of the award, participants must devote their activities to the approved research program and must be in-residence at an NGA facility or other approved facility and not at their home institution. NGA operates major facilities in the St. Louis, MO and the Washington, D.C. area. D.C. area facilities will move to Springfield, VA, in 2011. NGA approval is required before participants may accept additional monetary aid or other remuneration from another fellowship appointment or similar grant during the period of award.

Participants will be working in a classified environment. Approval for any publication of articles or presentations during the appointment is subject to the NGA process for public release of information. The requirement for publications and presentations to undergo a NGA public release process extends beyond the term of the appointment when a research product, article, or presentation contains information directly arising from participation in the appointment. For inventions conceived of or reduced to practice during the appointment, the fellow shall assign to NGA a perpetual world-wide royalty-free non-exclusive irrevocable license to practice the invention on behalf of the Government. An intern or fellow may hold a copyright in information created by the intern or fellow during the appointment.

NATIONAL GEOSPATIAL- INTELLIGENCE AGENCY (NGA)

COMPENSATION

The selected candidate will receive a monthly stipend. The stipend rate is determined based upon level of education, training, and experience. Inbound travel and moving expenses may be considered and reimbursed according to established policies. Limited travel and other costs will also be reimbursed for training related to the project as approved by the Oak Ridge Institute for Science and Education (ORISE) and the host installation. The participant does not become an NGA employee, and there are no fringe benefits paid.

The participant must show proof of health and medical insurance. Health plans are available through ORISE for Postgraduate Internship or Fellowship participants. The monthly stipend is intended to cover costs for health and medical insurance. NGA does not provide additional compensation for these expenses.

APPLICATION

Applications are accepted and reviewed on an ongoing basis. Selections are made as openings occur throughout the year. NGA expects there to be multiple positions. The Visiting Scientist Program for NGA is administered by ORISE. A complete application package consists of:

- Application form or a current *curriculum vitae* containing the information on the form
- 2 completed reference forms
- 2-4 page research proposal
- Transcripts
- Optional demographic form

Please reference **Project #NGA-LC-2009-15** when calling, emailing, or writing for information. For immediate consideration applicants may forward their resumes or *curriculum vitae* to the email address listed at the end of this announcement. Additional information and application material can be found on the following website: www.ornl.gov/maryland.

SECURITY REQUIREMENTS

The program is open to qualified U.S. citizens ONLY without regard to race, sex, religion, color, age, physical or mental disability, national origin, or status as a Vietnam era or disabled veteran.

- The "Questionnaire for National Security Positions," Standard Form 86 (SF-86) and "Fingerprint Chart," Standard Form 87 (SF-87) September 04 must be completed by the selectee to initiate a background investigation. The SF-86 can be found at <http://www.opm.gov/forms/html/sf.asp>. ***These forms must be received within two weeks of selection for an appointment, and required clarification must be completed within two weeks of request.***
- Top Secret security clearance with access to Sensitive Compartmented Information (SCI) required (may take 4-5 months to complete). Applicants who claim dual citizenship or hold foreign passports are not eligible for DoD granted security clearances. Clearance determinations are based upon careful consideration of the following:
 - o Allegiance to the United States
 - o Foreign Influence
 - o Foreign Preference
 - o Sexual Behavior
 - o Personal Conduct
 - o Financial Considerations
 - o Alcohol Consumption
 - o Drug Involvement
 - o Emotional, Mental, and Personality Disorders
 - o Criminal Conduct

Oak Ridge Institute for Science and Education
RESEARCH PARTICIPATION PROGRAM For the
NATIONAL GEOSPATIAL- INTELLIGENCE AGENCY (NGA)

- o Security Violations
- o Outside Activities
- o Misuse of Information Technology Systems
- Applicants must undergo a comprehensive background investigation and be adjudicated in accordance with the guidelines set by “Director of Central Intelligence Directive 6/4” and DoD 5200.2-R, “Department of Defense Personnel Security Program Regulation.” Available, reliable information about the person, past and present, favorable and unfavorable will be considered in reaching a determination. Each case will be judged on its own merits, and any doubt concerning personnel being considered for access to classified information will be resolved in favor of national security.
- A counterintelligence polygraph may be required.
- NGA is a drug-free workplace. Initial and random drug tests will be conducted.
