Is the nation ready for the needs of the growing population of older adults?

What We Offer

Adults over age 65 are living longer than ever before, and their longevity will necessitate preparing for gerontological issues, including health, societal, infrastructure, financial and other impacts that will result. We have the expertise to help your organization, including:

• Health research and evaluation
• Medical preparedness for vulnerable populations
• Epidemiological studies
• Health survey and surveillance programs
• Hazard evaluations and exposure studies
• Health communication, education and training
• Health data analytics
• 150-member university consortium

Why ORAU

• **Our Solutions Change Lives** – Our key customers include a number of government agencies, including the Department of Energy, CDC, FDA, EPA, Appalachian Regional Commission, state health departments and more. Whether addressing the opioid crisis in Appalachia or helping states develop plans to better communicate with at-risk populations during an emergency, we help our customers navigate complex issues and communicate effectively.

• **Trusted Expertise** – From managing large-scale health data registries to analyzing exposure health data to conducting health surveillance studies, ORAU’s seasoned professionals and award-winning solutions have helped secure national and global health since 1946

Can a machine accurately predict whether a social media user is vulnerable to “fake news?”

• Research being conducted in partnership with Penn State University
• Misinformation on social media impacts health concerns, like vaccine hesitancy.

Best practices for emergency and disaster response

• Addressing needs of vulnerable populations
• Collaboration with Arkansas Department of Health, Preparedness and Emergency Response Branch, and Arkansas State University Regional Center for Disaster Preparedness Education
